

Onions Are Put On The Market In Batches, The Market Price Is Under Pressure

At present, the yellow-skin onions on the market mainly come from Nanyang, Henan, and Fengxian, Xuzhou, Jiangsu. The yellow-skin onions in Nanyang, Henan Province were listed at the beginning of this month. The Yunnan onions were listed before. After the Henan onions were listed, the Yunnan onions withdrew from the Beijing market.

The recent decline in [China Garlic Prices](#) is mainly due to the fact that the onions in Xuzhou, Jiangsu, have also begun to go on the market, forming a situation in which the onions in Jiangsu and Henan will be jointly marketed. The sharp increase in the volume has caused onion prices to continue to fall. Last year, the price of yellow-skin onions was relatively high, mainly because the [prices of onions](#) had been sluggish the previous year, and farmers' enthusiasm for planting decreased, resulting in a decline in the area of onions planted in many places last year. Especially in Shandong, Jiangsu and Henan, the reduction of yellow-skin onions is more obvious, and the production capacity has decreased, making the price of yellow-skin onions on the market not only higher than that of the same period of last year, but also higher than that of purple-skin onions.

Similarly, due to the high price of onions in the same period last year, the overall onion planting area this year is basically more than last year, making the price flip from high to low. At the beginning of June, the onions in Jinxiang, Shandong and Pingdu will also be on the market, and then the onions in Henan will be delisted.
